Retail Catalogue 2023–24

From 1 July 2023

Melcourt[®] Industries Limited

Peat-free since 1983

Peat-free products are here to stay and Melcourt continues to lead the way. A true sense of partnership and support down the line, to our mutual and profitable benefit. That's why more garden centres than ever are stocking our products.

The Royal Horticultural Society (RHS) endorsement of many Melcourt products is boosting sales – and those sales could be going through your checkout. The RHS is one of the world's leading horticultural organisations and the UK's leading gardening charity with over 600,000 members, over 2.9 million annual visitors to their five gardens, and RHS.org.uk welcomes over 31 million users every year. Melcourt Industries Ltd are the only supplier of these kinds of products that fulfil the requirements of, and are endorsed by, the RHS.

® The Royal Horticultural Society. Trade marks of The Royal Horticultural Society (Registered Charity No 222879/SC038262) used under licence from RHS Enterprises Limited.

Contents

The mark of responsible forestry

With thanks to Leaf Creative, Huntley.

Dear Retailer,

We are delighted to present to you the Melcourt Stockist Catalogue 2023–24.

Although not the biggest supplier to the market, through sheer hard work and determination, it is fair to say that our peat-free products are widely recognised as amongst the best that you can buy.

Melcourt SylvaGrow products are unique in being endorsed by the Royal Horticultural Society (RHS). Melcourt are the very proud holders of two Royal Warrants. Furthermore, products in the SylvaGrow range have frequently achieved Which? Gardening 'Best Buy' awards.

We are constantly looking to add new products to our range. If you have any suggestions as to any new lines that you would like us to consider, please let me know. If you would like additional hard copies of our new catalogue, for your staff, please call us on 01666 502711.

May we all at Melcourt take this opportunity to say a big **thank you** to all of our loyal customers for their past business, and we look forward to welcoming new customers during 2023/24.

Best wishes,

Andy Chalmers

Melcourt and the environment

Peat-free

As the leading supplier of effective, peat-free growing media for both the professional and retail markets, Melcourt have illustrated very clearly the extremely good results that can be achieved without the use of peat.

We have not only provided amateur gardeners the wherewithal to garden without peat, we are also one of the main suppliers of peat-free growing media to the professional grower market in the UK.

Our growers have demonstrated that peat-free production is both commercially and competitively possible.

Responsible Sourcing

As founding members of the Responsible Sourcing of Growing Media Scheme (www.responsiblesourcing.org.uk) Melcourt have helped the industry

demonstrate the environmental and social credentials of the materials they are using.

Melcourt products are now scored on the system, allowing stockists to demonstrate their credentials to their increasingly well-informed customers.

Wood and plastic

All of Melcourt's eligible bark and wood-based ingredients hold Forest Stewardship Council certification. The Forest Stewardship Council (FSC) is an international network that promotes the responsible management of the world's forests.

We are constantly looking for ways to reduce our use of plastic. At present there isn't a material that can fully replace it as our products are frequently damp, heavy and stored outside.

However, our polythene bags currently contain 30% recycled plastic and we are working with our supplier to raise this to 50% by 2025.

Our bags are also fully recyclable. The award-winning Melcourt Bag for Life scheme (see page 17) allows participating garden centres to offer a reusable bag system which is very popular with consumers.

Decorative Aggregates

Endorsements

To make it easier for you to see the suitability of our products for your customers, here's a key to symbols for each product to look out for when choosing a product.

ROYAL HORTICULTURAL SOCIETY

Indicates that the product is endorsed by the RHS, one of the world's leading horticultural organisations and the UK's leading gardening charity.

Endorsed by

JOHN INNES SEAL OF APPROVAL

Indicates that the SylvaGrow® John Innes range has been inspected and approved by John Innes Manufacturers' Association (JIMA).

SOIL ASSOCIATION

The UK's most well-known organic certification body approves our organic range, the logo on-pack giving real credibility to the organic claim.

SUITABLE FOR USE BY VEGANS

An increasing proportion of customers look for vegan-friendly products, which many of our composts are.

FSC® CERTIFICATION

All eligible Melcourt products are certified by the Forest Stewardship Council (FSC®) indicating that we only use bark and wood from sustainably managed sources.

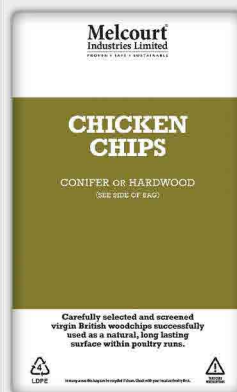

Poultry & Reptile Bedding

Poultry Chips

CHICKEN CHIPS – SOFTWOOD

Carefully selected and screened softwood chips. Made from UK-sourced virgin wood chips and contains no recycled wood waste. Select which product you require together with a RHS endorsed Melcourt **Bag For Life**.

How to use

The customer chooses a product and the store fills the Bag For Life from the Maxi Bale. Customer pays for the growing media, and a **Bag For Life** (if a first-time customer). Customer uses the product and returns to the store to buy more product using the same **Bag For Life**.

Product for the refillable **Bag For Life** bags comes in a Maxi Bale. Each Maxi Bale contains 2500 litres, is spun-wrapped, labelled, and delivered on a recycled and recyclable one-way-trip pallet.

Buy a pack of 55 **Bag For Life** bags that you can sell to your customer to fill repeatedly with compost or mulch from the Maxi Bales. On their third refill, customers would be in plastic 'credit' – a contribution in kind to the environment.

Bag For Life

Refillable Bags

Bag For Life	Pack of 55 bags
Product Code	8506
Barcode	5060157811206

Melcourt Bag For Life Sales

For each sale you'll need to scan two barcodes. One for the refillable **Bag For Life**, and one from the list of Maxi Bales for the contents – unless the customer's brought the refillable **Bag For Life** back for a refill. If you're selling a refill, only scan the product contents Maxi Bale barcode.

Stockist Information

Getting the best from Melcourt stock

We constantly analyse customer feed-back and are always seeking practical ways to improve our offer. The most frequently raised issues by consumers hinge around product storage and stock rotation.

Product Storage

- All of our polythene packed retail products are carefully machine packed and hooded for weather protection.
- At the garden centre or retail outlet, these products, particularly composts, topsoil and soil improvers, should be stored in dry, under covered areas.

Stock Rotation

- During manufacture, each bag is clearly laser printed with the date of manufacture.
- During the season, please take care to ensure that the oldest stock is sold first.
- It is not good practice to hold stock that is over one year old.
- At the end of the season, we recommend that you clear any remaining stock, leaving just enough stock to service the quieter winter months.
- Re-order fresh stock late winter for following season's sales.

THE MANUFACTURER

Should provide simple and clear information to both stockists and consumers, covering: product use; product management; and use by date. Melcourt also provide support both in the field and on our helpline.

Melcourt have invested in state of the art laser printer so that date of manufacture is clearly printed.

We do not make large quantities of compost during the 'low season', for sale next year, but usually make our compost products within four weeks of despatch.

In the rare occurrence of a customer complaint, we respond promptly and courteously usually to the complainant's entire satisfaction.

FOR THE RETAILER

All Melcourt peat-free composts are 'active' and should be sold and used in accordance with the instructions which are clearly printed on each pack.

The issue of stock rotation is extremely important. Melcourt field sales staff will explain to our stockists why and what simple steps should be taken to help.

We recommend that at the end of each season, all old stock is sold, leaving space for new, fresh stock to be bought in next season.

Unfortunately, we do not offer a sale or return service, therefore it is clearly for the stockist to ensure that the oldest stock is sold first.

FOR THE CUSTOMER

Carefully follow the instructions that are printed on the back of the bag regarding use by advice.

If you need further help, contact Melcourt.

Any surplus compost that is not used within the recommended period can be spread onto the garden as an effective soil improver.

The polythene bag containing the product is strong enough to be re-used many times around the home and garden. For example, as a hanging basket liner, as a sturdy container for canes or for taking green waste to the tip.

Frequently asked questions.

What is peat-free compost?

Peat-free compost is simply a growing medium manufactured without the inclusion of peat. Peat has been the staple ingredient in UK growing media for many decades but since the late 1980s environmental concerns have created the need to look for alternatives.

Why the change to peat-free?

It is now widely recognised both in the UK and internationally that the harvesting of peat releases vast quantities of carbon dioxide into the atmosphere. In addition, left in situ it is also host to a unique flora and fauna as well as having an important role in flood mitigation.

When will peat be banned in the UK?

The UK government is proposing to ban the use of peat in retail products from 2024. They plan to follow this up with a ban on the use of peat in professional growing by 2026 (with a few exceptions).

Are they made to a British Standard specification?

There is no British Standard for growing media but the Responsible Sourcing of Growing Media (see below) includes a performance standard. At Melcourt we carry out our own rigorous testing at our two regional trials sites in order to ensure that our composts are consistently achieving the required high standard of performance.

Are all peat-free composts the same?

Very definitely not! Melcourt have been at the forefront of peat-free development having launched their first professional peat-free compost Sylvamix, in 2001. Widely acknowledged to be the market leader, SylvaGrow was brought to the retail market in 2014 and since then the range has won many performance awards, become endorsed by the RHS and gained two Royal Warrants.

Do peat-free composts need different management to peat-based products?

Peat-free composts vary in their ingredients and so the management required for them to best perform also varies. However, at Melcourt we realised that it isn't practical to expect gardeners of different degrees of experience to be able necessarily to judge how to manage their composts. So we designed our SylvaGrow range to be easy to use and its management is very similar to traditional peat-based media. However, in common with many peat-free media it can look dry on the surface when in fact it is perfectly adequately watered underneath. We recommend checking this using the weight of the pot or by the 'finger test' – simply pushing a finger into the layers below the surface in order to check the moisture content.

What does 'organic' mean?

The word 'organic' is one of the most mis-used words in retail horticulture. Often confusingly used to merely indicate the presence of organic matter in a mix, a truly organic product is one that is approved by a recognised organic certification body following a strict audit process. It will contain only materials that are free from artificial fertilizers and pesticides. SylvaGrow Organic and the Planter for Organic Growing are approved by the Soil Association which is the nation's most well-known organic certification body.

What is the 'Responsible Sourcing Scheme'?

The Responsible Sourcing of Growing Media Scheme allows stockists and consumers a much greater level of transparency about the ingredients used in composts and their impacts on the environment. Created by a cross-industry group that included conservation bodies, manufacturers, retailers, growers, the HTA and the RHS, the newly-launched scheme brings evidence and clarity to an area that has previously been clouded by misinformation and conjecture. Melcourt are founder members and have been very involved in the formation of the scheme. For more information see: www.responsiblesourcing.org.uk

What is John Innes?

John Innes compost is a soil-based medium based on a formula created at the John Innes Institute in the 1930s. The SylvaGrow John Innes range is peat-free. See our website for a full description including the history of this heritage range.

Why are various products in Melcourt's retail range endorsed by the Royal Horticultural Society?

Melcourt peat-free growing media were already being widely and successfully used in RHS gardens when they decided to look for a brand of peat-free growing media, soil improvers and mulches to endorse. SylvaGrow was an obvious choice given that they had tried and tested it for years and knew it to be a consistently high-performing peat-free compost. Being 100% peat-free and the organic products holding Soil Association approval were major considerations in their decision.

Melcourt celebrates 40 years 100% peat-free.

As Melcourt enters its 40th year, we celebrate all that the company has become, its aims, values and mission, the breadth of its offer across many sectors, its people, commitment to the environment, charitable works and more.

Quality and innovation have always been at the heart of Melcourt's activities, driving our choices and guiding our approach to business. Here we describe how we achieve some of the best and most consistent quality available across the sectors we serve.

Indeed the quality of our products has long been recognised and we are honoured to have been awarded Royal Warrants from Her Majesty Queen Elizabeth II and at the time of the award,

the former His Royal Highness the Prince of Wales. We are also very proud to uniquely hold Royal Horticultural Society (RHS) endorsement for many products in our retail range.

A successful business is also a responsible business and as founding developers and members of the new Responsible Sourcing of Growing Media Scheme we are delighted that customers can now check the environmental and social impacts of the growing media we manufacture.

Our wood and bark purchasing policies include a commitment to UK forestry and our Forest Stewardship Council (FSC®) certification ensures that our raw material purchasing decisions are

driven on the basis of responsible forest practices.

Many of our growing medium ingredients meet the exacting standards of the UK's most influential organic charity, the Soil Association and we have been certified by them since the early 1990s.

A company is only as good as the people it employs and at Melcourt we have a skilled and dedicated team, some of whom have celebrated more than three decades with the company. Our staff have customer service and integrity at their core and we believe that the long term relationships we have built over many years illustrate the commitment and loyalty that we have to our customers and which they have to us.

Directors, sales teams, operators & HQ staff gather to celebrate 40 peat-free years of Melcourt.

Andy Chalmers, Managing Director of Melcourt cuts the cake.

Jenkinson), and Nigel Bullock (not in picture).

- 1983** ● Melcourt Industries Ltd incorporated. Initial sales of bark mulch, natural play surfaces, and all-weather riding surfaces for horses.
- 2001** ● **Sylvamix** launched – a unique 100% peat-free professional growing media range.
- 2014** ● **SylvaGrow Multi-Purpose** retail compost launched.
- 2015** ● **SylvaGrow** achieves Consumer Association Which? Gardening 'Best Buy' (the first of many).
- 2016** ● Melcourt retail products uniquely endorsed by **Royal Horticultural Society (RHS)**.
- 2018** ● **ROYAL WARRANT** granted to Melcourt by HRH the Prince of Wales for the supply and manufacture of peat-free *Organic Growing Media*.
- Government includes peat reduction targets in Policy Paper, *A Green Future: Our 25 Year Plan To Improve The Environment*.
- 2019** ● Another bagging line added to meet increasing demand for growing number of stockists.
- 2020** ● Coronavirus pandemic encourages three million new gardeners which helps record sales of SylvaGrow.
- 2021** ● A totally new computer system installed integrating all aspects of the business and greatly increasing efficiency.
- 2022** ● **ROYAL WARRANT** granted to Melcourt, this time from Her Majesty Queen Elizabeth II for the supply of *Horticultural Products*.
- Further investment in the business with another fully automated bagging line.
- The SylvaGrow range expands again to include the new **Rose, Tree and Shrub** planting compost.
- 2023** ● Melcourt celebrates 40th Birthday.
- **SylvaGrow Multi-Purpose** gets Which? Best Buy for category *Compost–Raising Young Plants*.
